

NanoTech Materials Roof Cleaner

Cleaner for Single-Ply Roofing Membranes

DESCRIPTION:

NanoTech Materials Roof Cleaner is a high-performance, waterborne cleaner designed for tough single-ply roof surfaces, like weathered EPDM roofs. Its proprietary formula removes degraded surface rubber, enhancing the effectiveness of pressure washing and reducing the labor required to prep the roof surface for NanoTech Materials Cool Roof Base Coat installation.

USAGE:

Cleans and prepares single-ply roofing by removing surface residue.

APPLICATION:

- Sweep loose debris from areas to be cleaned.
- Stir well.
- Wet the surface at a rate of approximately 300-500 square feet per gallon.
- Keep the surface wet with regular water for 5-10 minutes.
- After 1 minute of soaking, agitate the surface with a stiff bristle broom, power scrubber, etc.
- After 5-10 minutes of soaking, thoroughly power-wash the roof.
